## **DETAILED ACTION**

### ***Claim Objections***

Claims 7,8,9 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. How do these claims further **structurally** limit the claims they depend upon?

### ***Claim Rejections - 35 USC § 112***

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The 'for example' phrase is indefinite as it is not clear what is being positively claimed.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,6-10,12-14,16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hollely et al. This patent discloses the basic process and apparatus of cryogenically cooling material prior to it's being pulverized; note particularly figure 2.

Claims 1-3,6-10,12-14,18,19 are rejected under 35 U.S.C. 102(b) as being anticipated by Venetucci. This patent discloses the basic process and apparatus of cryogenically cooling material prior to it's being pulverized; note particularly figure 1.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4,5,11,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Hollely et al or Venetucci. The limitations of these claims would have been obvious design choices only once the basic apparatus and process was known. For example, the type of crusher used e.g. flywheel turbine, would have been a design choice only based on several factors such as material being treated and desired end results.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
